**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (APA) in view of either Rhoads or the German '935 patent (German). APA is the apparatus discussed in the first few pages of the specification i.e. a manually operated coffee grinder. Manually operating the grinder is inefficient. APA also discloses an electric coffee grinder that is difficult to use in certain places e.g. outdoors, because of the necessity of an outlet which is not always available. Both Rhoads and German solve this problem by disclosing similar coffee grinders including the use of batteries to drive the grinding mechanisms. In order to provide for a more useful grinder, it would have been obvious for one of ordinary skill in the art to modify APA by providing batteries and associated drive means as the power source, taught to be desirable by both Rhoads and German. Any remaining limitations not disclosed in the reference combination would then have been either obvious design choices as they solve no stated problems or elements well known in the art. For example, the use of adjusting means in a grinder is well known in the art and of no patentable merit.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
